Keegan Farkas

Light Bulb = Primary Key

Assumptions:
- A member is associated with the branch that they first registered with, but if that branch shuts down, their membership will still exist, just with null branch_no until changed.
- Sizes of all attributes(branch_no, etc.)
- Rental number is a slot 1-10, so since (rental_no, member_no) is the primary key, a member can have at most 10 rentals.
- Main actors will be a list rather than each actor having their own column. Ex. Chris Evans, George Clooney, Margot Robbie
